Cures Grip in Two Days.

Take Laxative Bromo Quinine Tablets. Seven Million boxes sold in past 12 months.

This signature, *E. W. Grove* on every box. 25c.

The June Cosmopolitan.

The lover of fiction—especially in the form of short Stories—will turn with pleasure to the latest issue of the Cosmopolitan. Here appear a charming love story by Francis Willing Wharton, beautifully illustrated by Thomas Mitchell Pierce; a dramatic railroad story by R. H. Farham; a romance of the business world by Trumbull White, and contributions by R. H. Martin and Henry Seton Merriman. In the same number, which is remarkable for the great variety of topics that are discussed, Edward Everett Hale writes on Old-Age Pensions; Dr. Albert Shaw, editor of the Review of Reviews, discusses Journalism as a profession; H. G. Wells advances some more of his ideas on Love and the cultivation of the Imagination; and Mary E. Thornton gives some practical advice on How to Care for the Sick in the Home. An essay on The Rose of Yesterday and To-day is superbly illustrated with photographs; some fine illustrations being also a feature of an article on Gateways; Artistic and Characteristic; a contribution on Floral Head-Dresses, and an interesting account of an English Garden City. The personal articles include character sketches of Geo. Gilbert Williams, the great banker; William Barclay Parsons, chief engineer of the New York Rapid Transit Commission; and Baron Strathcona and Mount Royal, High Commissioner for Canada. There are also contributions by William R. Lighton, Antoinette Van Hosen, John Brisben Walker, and Julian Hawthorne. In all, there are twenty-one stories and articles in the June Cosmopolitan.

Chamberlain's Colic, Cholera And Diarrhoea Remedy.

The uniform success of this remedy has made it the most popular preparation in use for bowel complaints. It is everywhere recognized as the one remedy that can always be depended upon and that is pleasant to take. It is especially valuable for summer diarrhoea in children and is undoubtedly the means of saving the lives of a great many children each year. For sale by C. K. Wyly, druggist.

Want Separate Presbyteries.

The Northern General Assembly at Los Angeles entered upon consideration of the resolution which provides for the establishment of separate presbyteries for whites and negroes in the South. The colored delegates in the assembly desire action on the resolution in the present assembly.

A Splendid Remedy.

Neuralgic pains, rheumatism, lumbago and sciatic pains yield to the penetrating influence of Ballard's Snow Liniment. It penetrates to the nerve and bone, and being absorbed into the blood, its healing properties are conveyed to every part of the body and effect some wonderful cures. Mr. D. F. Moore, agent Illinois Central railway, Milan, Tenn., states: "I have used Ballard's Snow Liniment for rheumatism, backache, etc., in my family. It is a splendid remedy. We could not do without it." 25c, 50c and \$1.00 at R. C. Hardwick's.

Stockholders Meet.

At a conference between a committee of the common stockholders of the Louisville Railway Company and Maj. A. H. Davis, the committee insisted that the common stockholders' claims to the equity in the road be recognized when the road is reorganized.

Tax on Babies.

Extreme hot weather is a great tax upon the digestive power of babies; when puny and feeble they should be given a few doses of White's Cream Vermifuge, the children's tonic. It will stimulate and facilitate the digestion of their food, so that they become strong, healthy and active. 25c at R. C. Hardwick's.

Automobile Route.

An Automobile rural free delivery route has been established between Knoxville and Sevierville, Tenn.

To Cure a Cold in One Day

Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25c.

Committed Suicide.

Geo. White, a convict in the Frankfort penitentiary, committed suicide by throwing himself from the seventh tier of the prison.

CASTORIA.

The Kind You Have Always Bought. Bears the Signature of *Dr. J. C. Williams*

THREE-COLOR PHOTOGRAPHY.

New Process Using Paper Instead of Glass.

At the London Camera club Mr. Sanger Shepherd gave a demonstration of a new process of producing three-color photographs on paper instead of on glass, as has been chiefly done hitherto. Thus far nearly all the three-color processes brought forward are merely modifications of that proposed, and, indeed, practiced long ago by Ducos du Hauron, in which three negatives are made through three colored screens, and these are successively printed, each in the color complementary to that of its screen, and superimposed. Thus, the negative taken behind a green screen would be printed in red and yellow and blue, prints being secured from negatives taken with blue and red screens respectively, and, being produced on transparent film, can be laid one upon the other, and the trichromatic effect produced. The extreme delicacy of the films and the difficulty of getting the three images in exact register have proved a serious obstacle until the improved Lumiere process introduced thin sheets of talc as the supports for the colored prints. The chief point of divergence in the process now shown by Mr. Sanger Shepherd, says the London Times, is that the three successive images are actual printings in pigment instead of being superimposed films. The same triplet of negatives is required, and these are dyed the three primary colors. The paper to be printed on is prepared by thinly coating with gelatine, and with this gelatinized surface the red-dyed negative is first brought in contact. In the course of a few minutes the dyed film parts with its coloring matter, which, by a principle familiar with collotypers and others, filters out into the freshly presented gelatine, and the yellow and blue are afterward printed in the same way. Credit may be given to Mr. Sanger Shepherd for having thus thought of applying to trichromatic printing a method which long ago was used in monochrome, but the difficulties, which further experimenting may remove, but which at present would seem to exist, are that, given exact registration of the three successive negatives, it is not clear how a blurring due to the lateral spreading of the color as it is taken up by the gelatinized paper can be prevented, and, as the amount of duration of each printing is controlled by the judgment or taste of the operator, no reliance can be placed on securing the precise relative proportions of the three colors requisite for producing, even approximately, the entire range of natural color; nor is it explained how, should the process be employed commercially, uniformity among any number of copies is to be secured.

CLEAN CHIMNEYS.

Cheap Means Which Any One Can Use.

The tendency of pipes and furnace flues to fill with soot is so marked that any suggestion of a convenient remedy for that condition is worthy of serious consideration. A correspondent of the St. Paul Pioneer Press says that zinc burned in the furnace is very effective. Just throw upon the fire a handful of zinc filings, or a piece of sheet zinc as large as your hand, and it clears away the soot as if by magic. Once a week will suffice. Shut the door quickly after throwing in the zinc. Our informant says his family has used this method for 40 years, and never had occasion to employ a chimney sweep.

As the Pioneer Press suggests, this remedy is not expensive. A worn-out zinc washboard will furnish enough of the metal for six or eight occasions. And if you have to buy sheet zinc, 25 cents' worth may suffice for a single fire all winter. Even when soft coal is used in hard coal stoves and furnaces the zinc will keep them open, so that those who have been unable to secure anthracite will not be seriously inconvenienced by the change.

If this recipe from St. Paul is all that is claimed for it the inconveniences of using soft coal are reduced to a minimum, and its cheapness more than compensates for being deprived of hard coal. If it will keep the chimneys clean the cost of chimney sweeps as well as the dangers from fire by burning out are both avoided.

New Life-Saving Device.

The United States navy have adopted an illuminated life-saving buoy so arranged that as it is released a couple of bright lights, about two feet high, are ignited, and remain burning for a considerable time. It will be a very useful contrivance in the dark.
